

Brainstorming & Idea Prioritization Template

Date	23/09/2026
Team ID	SWTID-2026-3089
Project Name	Streamlining IT Procurement: Automating Standard Laptop Orders with Flow Designer
Institution	Arignar Anna College Code: MSU 302
Team Members	Aldhaf F (Leader), Bhuvanasri S, Dhanisha Muhi N S, Divya Lakshmi K, Dharshini P
Maximum Marks	3 Marks

Step 1: Brainstorm and Idea Listing

Each team member lists out as many ideas as possible without judging them at this stage to address delays, manual overhead, and lack of automated task routing in IT laptop procurement.

S.No	Team Member	Idea / Suggestion	Category	Group No.
1	Aldhaf F	Automate Catalog Task creation and auto-assignment to Hardware team using ServiceNow Flow Designer upon request approval.	Workflow Automation	1
2	Bhuvanasri S	Write custom JavaScript Business Rules and Client Scripts on Requested Item table to generate configuration tasks.	Custom Scripting	2
3	Dhanisha Muhi N S	Build a dedicated Service Catalog item for Standard Laptops with integrated Flow Designer process engine binding.	Service Catalog	1
4	Divya Lakshmi K	Integrate a third-party procurement software via REST APIs and Webhooks to manage laptop procurement and delivery.	External Integration	3

5	Dharshini P	Implement manual task creation with automated email notifications sent to the Hardware support mailbox upon order placement.	Notification System	2
6	All Members	Native ServiceNow Flow Designer Solution: Service Catalog Trigger → Approval Verification → Auto-generated Catalog Task with 'Laptop need to Configured' and Hardware group routing.	End-to-End Automation	1

Step 2: Idea Prioritization

Rate each grouped idea on feasibility and importance, then select the final idea(s) to move forward with.

Group No.	Final Idea	Feasibility (High/Med/Low)	Importance (High/Med/Low)	Priority	Selected (Yes/No)
1	Automate procurement using native ServiceNow Flow Designer & Service Catalog (Standard Laptop Task)	High	Very High	1	Yes
2	Custom JavaScript Scripting (Business Rules) & Email-based alerts	Medium	Medium	2	No
3	Third-party procurement software integration via external APIs	Low	Medium	3	No

Selection Rationale & Conclusion

Group 1 was unanimously selected because ServiceNow Flow Designer provides a robust, low-code/no-code process automation environment built natively into the platform. It eliminates manual intervention, requires zero custom maintenance code, seamlessly connects the Service Catalog to the Hardware assignment group upon approval, and fulfills all project objectives within the implementation timeline.
