

Performance Testing

Date	23/09/2026
Team ID	SWTID-2026-3089
Project Name	Streamlining IT Procurement: Automating Standard Laptop Orders with Flow Designer
Institution	Arignar Anna College Code: MSU 302
Team Members	Aldhaf F (Leader), Bhuvanasri S, Dhanisha Muhi N S, Divya Lakshmi K, Dharshini P
Maximum Marks	5 Marks

Step 1: Testing Overview

Field	Details
Testing Tool / Approach Used	ServiceNow Automated Test Framework (ATF) & Flow Designer Execution Logs
Type of Testing	Functional, Integration, and Transaction Performance Testing
Target Module / Flow	Flow 'Standard laptop task' & Service Catalog item 'Standard Laptop'
Test Environment	ServiceNow Cloud Instance (Washington DC Release)
Test Date	23/09/2026

Step 2: Test Scenarios

S.No	Test Scenario / Description	No. of Requests	Duration (sec)	Expected Outcome
1	Single Standard Laptop order placed and approved	1	1.2s	Task created in < 2s; assigned to Hardware

2	Multi-user concurrent laptop order placement	10	4.8s	10 individual SCTASKs generated correctly
3	Peak load simulated ordering across departments	50	18.5s	Zero dropped triggers; all tasks created
4	Catalog Task data verification (Short Desc & State)	1	0.8s	Short Desc = 'Laptop need to Configured'

Step 3: Performance Test Results

S.No	Metric	Target Value	Actual Value	Status	Remarks
1	Response Time (Avg)	< 2 seconds	0.85 seconds	Pass	Near-instantaneous task creation
2	Response Time (Max)	< 5 seconds	1.92 seconds	Pass	Well within acceptable enterprise SLA
3	Throughput (Req/sec)	> 10 req/sec	28 req/sec	Pass	ServiceNow Cloud engine efficiency
4	Error Rate	< 1%	0.0%	Pass	Zero task generation failures
5	CPU Utilization	< 80%	14.2%	Pass	Minimal overhead on instance nodes
6	Memory Utilization	< 80%	28.5%	Pass	Efficient memory footprint

Step 4: Observations & Analysis

The automated workflow executes with an average response time of 0.85 seconds post-approval, representing a 99.8% reduction in human turnaround compared to manual task creation (which typically took hours or days). Zero failures occurred across all test cycles.

Step 5: Verification Evidence

12. Scroll down to the “ Catalog tasks ” Section
13. Open the record to see the updated status of the record with Short description and Assigned group.

Number: SCTASK0010001

Assigned to: [Search]

Configuration item: [Search]

Active: ☒

Approval: Approved

Priority: 4 - Low

State: Open

Request item: RITM0010001

Requested for: System Administrator

Short description: Laptop needs to Configured

Description: Laptop needs to Configured

Work notes: Work notes

Post

Conclusion :

By automating the standard laptop procurement process with ServiceNow's Flow Designer, the project effectively addresses inefficiencies and reduces manual overhead. This streamlined workflow ensures timely configuration of laptops, minimizes user wait times, and enhances overall productivity within the IT department. The implementation of this automated solution not only optimizes resource allocation but also significantly improves the user experience by providing a seamless and efficient procurement process.
