

Project Executable Files

Date	23/09/2026
Team ID	SWTID-2026-3089
Project Name	Streamlining IT Procurement: Automating Standard Laptop Orders with Flow Designer
Institution	Arignar Anna College Code: MSU 302
Team Members	Aldhaf F (Leader), Bhuvanasri S, Dhanisha Muhi N S, Divya Lakshmi K, Dharshini P
Maximum Marks	3 Marks

Project Executable Files

This section requires submission of all executable and deployable files for the project. All files are properly organized, named, and uploaded to the submission platform so that the evaluator can run or deploy the solution using the provided files and instructions.

Step 1: Submission Checklist

S.No	Item to Submit	Submitted (Yes / No / NA)	File / Resource Name & Description
1	Complete source code / XML exports	Yes	ServiceNow Update Set XML: `sys_remote_update_set.xml`
2	README / Setup Guide (instructions to run the project)	Yes	`README.md` with complete 3-milestone setup instructions
3	requirements.txt / package.json / dependency file	Yes	Flow Designer configuration export: `standard_laptop_task_flow.xml` (Active Flow definition)
4	Database schema / seed files (if applicable)	Yes	Service Catalog item configuration: `maintain_items_standard_laptop.xml`
5	Environment configuration file (.env.example or similar)	Yes	Assignment group definitions: `sys_user_group_hardware.xml`
6	Deployed application URL (if hosted)	Yes	https://dev409804.service-now.com/sn_glider_app/servicenow_studio.do?environment=sns
7	APK / Executable binary (if applicable)	NA	Cloud-native SaaS deployment (no standalone binary needed)
8	Dockerfile / Containerization config (if applicable)	NA	Managed ServiceNow Enterprise Cloud Infrastructure
9	Test files and test results	Yes	Execution history logs and screenshot walkthrough

10	Demo video or walkthrough (if required)	Yes	Video walkthrough demonstrating live ordering and task creation
----	---	-----	---

Step 2: File / Folder Structure

Overview of the project file and folder structure:

```
ServiceNow_Project_Report_SWTID-2026-3089/
|-- README.md ..... setup & run instructions (3 milestones)
|-- update-set/
|   |-- sys_remote_update_set.xml  Flow + Catalog item configuration
|-- flow-designer/
|   |-- standard_laptop_task_flow.xml  Active flow definition export
|-- catalog-item/
|   |-- maintain_items_standard_laptop.xml  Standard Laptop item config
|-- user-groups/
|   |-- sys_user_group_hardware.xml  Hardware assignment group
|-- screenshots/ ..... milestone-wise implementation evidence
|-- test-evidence/ ..... execution logs and test results
|-- demo/
|   |-- demo_video_walkthrough.mp4  live order -> auto task creation
```

Step 3: Deployment / Access Details

Field	Details
Hosted / Deployed URL	https://dev409804.service-now.com/sn_glider_app/servicenow_studio.do?environment=sns
Login Credentials (Demo)	Username: agga0885@gmail.com Password: 156657Ag*
Platform / Hosting Provider	ServiceNow Enterprise Cloud (SaaS)
Repository Link	https://github.com/aldhaf2007/Streamlining-IT-Procurement-Automating-Standard-Laptop-Orders-with-Flow-Designer-project-repo
Demo Video Link	https://drive.google.com/drive/folders/1pkpjx0uq47RgdQYAj3OSSJcS0i4AAU4Z

Step 4: Run Instructions

Clear, step-by-step instructions for the evaluator to run the project:

Pre-requisites: ServiceNow developer instance (PDI) with admin role; modern browser (Chrome / Edge); update set XML files provided in the submission.

Step 1: Log in to the target ServiceNow instance with administrative privileges.

Step 2: Navigate to System Update Sets -> Retrieved Update Sets -> Import Update Set from XML.

Step 3: Preview and Commit the update set to load the Flow and Catalog item configuration.

Step 4: Open Flow Designer -> open 'Standard laptop task' -> verify the Service Catalog trigger and the Create Catalog Task action -> Click 'Activate'.

Step 5: Navigate to Service Catalog -> Hardware -> Standard Laptop -> click 'Order Now' to place a test order.

Step 6: Open the generated Request, approve it, and verify that the Catalog Task is auto-created with short description "Laptop needs to Configured" and Assignment group = Hardware.

Step 5: Known Issues / Limitations

S.No	Known Issue / Limitation	Workaround / Status
1	Personal Developer Instance sleeps after 10 days of inactivity	Wake up the instance via the ServiceNow Developer Site
2	Update set import order dependency (assignment group must load before the flow)	Import `sys_user_group_hardware.xml` first, then the flow update set
3	Approval step requires manual approver action in the PDI	Pre-configured demo approver account is used during demonstration
